

NEC-E

ELEMENT MANAGEMENT CONTROLLER

Application

- ▶ Management and supervision of network elements
- ▶ Local Management Terminal (LMT)
- ▶ Translation of RS-485 polled data and up to 12 binary status data to SNMP/Ethernet and Webbrowser/Ethernet protocol

Features

- ▶ LC-Display and 6-push-buttons for data display and entry
- ▶ RS-485 interface to poll slave units via BK-BUS supporting BKtel and WISI-HMS022 protocols
- ▶ RS-232 interface for local setup and local software download
- ▶ BK modular design (1 unit)
- ▶ SUB-D15 connector with 6 general purpose input/outputs, 6 general purpose inputs and 2 power supply outputs
- ▶ Ethernet 10/100 Mbps RJ-45 connector supporting SNMPv1 and embedded Webserver via Webbrowser
- ▶ LED modul status indicator
- ▶ 2 LEDs for Ethernet link supervision: data and link
- ▶ Flash Microcontroller Technology for easy software updates via Ethernet Interface or RS-232 port
- ▶ Low power consumption of 2.5 W
- ▶ Power supply voltage of 24 VDC or 6.5 VDC
- ▶ Very thin design, only 1 U
