

# Two-year warranty? We guarantee more!

## The BKTEL® warranty extension

Highly complex and technological products that have been specially developed and modified for their intended use are, in principle, subject to the same statutory warranty as any other consumer goods. If the device fails during this period, the manufacturer must provide repair or replacement. However, if the device is integrated into an everyday process, this can be difficult and may lead to downtime. The fault must be located, the device removed, sent in, repaired, or replaced. A time-consuming procedure begins. With our warranty extension, you get the security and service you need — even far beyond the statutory warranty.

## We promise quality

Every single product from the HUBER+SUHNER BKtel factory is thoroughly tested by our quality control team before shipping and installation. After purchase, our expert service team is available to answer your questions, diagnose faults, or handle complaints.

## Up to 7 years warranty

We guarantee our products for up to seven years. In addition, with the warranty extension via our customer center, you receive exclusive access to the latest documentation, firmware, and software. This ensures that you are always up to date with the latest technology. Guaranteed!

## Choose for yourself

Choose from 5 warranty packages ranging from 1 to 5 additional years. These can be purchased directly when you buy the product or within the following 6 months.
